

Setting Your QI Goals

Question	Your Plan
<p>What data sources did you use to identify a performance gap in your practice? (Examples: performance measure data in a registry, PQRS report, performance measure calculated from a chart pull, practice assessment survey data)</p>	<p>The data I used to identify a performance gap were:</p>
<p>What were your performance gap(s)? (Examples: 20% of my diabetic patients have a documented foot exam; 20% of my patients over sixty years of age have received a vaccine for shingles; I do not systematically screen my patients with chronic pain for depression.)</p>	<p>My performance gaps are:</p>
<p>Based on the performance gap, what is your practice transformation target/aim? (Examples: Increasing diabetic foot exams; increasing shingles vaccination among my patients over 60; implementing a depression screening tool for chronic pain patients.)</p>	<p>I want to accomplish:</p>
<p>What are your specific practice transformation goals? (Example: I will increase documented foot exams among my diabetic patients to 50% over the next three months.)</p>	<p>Level of change =</p> <p>Timeline for change =</p> <p>Patient population with whom I will work =</p>
